## ***Your Design, Your Way in Your Colours***

### **Jersey**

The jersey is constructed from 100% polyester micromesh. It is extremely breathable, soft & light. Perspiration will dry quickly.

The fabric is rated UPF 35+ sun protection factor.

The torso has a modern fit & good length, ensuring comfort in the riding position.

There is a 3/4 length invisible zip.

The hem around the waist is elasticised for a snug fit.

### **Elasticised Waist (Knicks)**

The knicks have an elasticised waist providing comfort & support around the abdomen.

### **Chamois**

We use the best comfort money can buy. Our chamoises are made in Italy. A multi-layered structure with various densities of padding assist the vital pressure points when seated in the saddle.

Every chamois is positioned & stitched into the knicks with total precision. Not too far forward, not too far back - just perfect for riding hard.

### **Leg Gripper**

A hypo-allergenic rubberised leg grip is used to enhance a snug fit around the hem.

### **Raglan Sleeve**

The raglan sleeve offers comfort to the shoulders when in the riding position. It is also ideal advertising space to support your sponsors, display graphics or send a message.

The bottom end of the sleeve is elasticised.

### **3 - Way Back Pocket**

The back pocket contains 3 compartments with a gusseted bottom end, this allows for storage of bulky items - the pocket expands accordingly.. The height of the pocket is ideal for retrieving items when riding.

### **Knicks Side Panel**

The side panel is constructed from Lycra. Ideal for comfort & stretch. The side panel offers advertising space to support your sponsors, display graphics or send a message.

### **Knicks Front & Back Panels**

The front & back panels of the knicks are constructed from 100% nylon, giving stretch and strength. Nylon offers great resistance to abrasion and fabric stress which occurs after many hours in the saddle.
